

Leave as it is and click the Publish button to create repo and push code to GitHub!

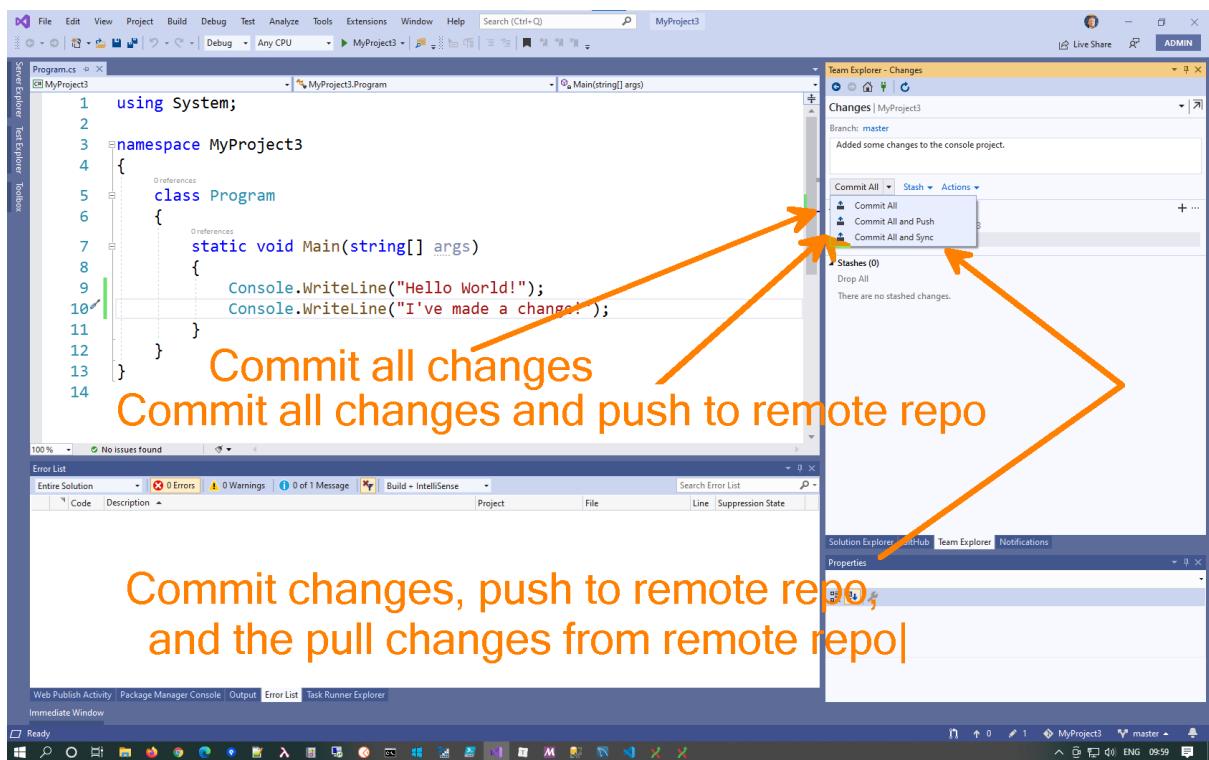

This is the view that will appear when you publish the repository to e.g. GitHub

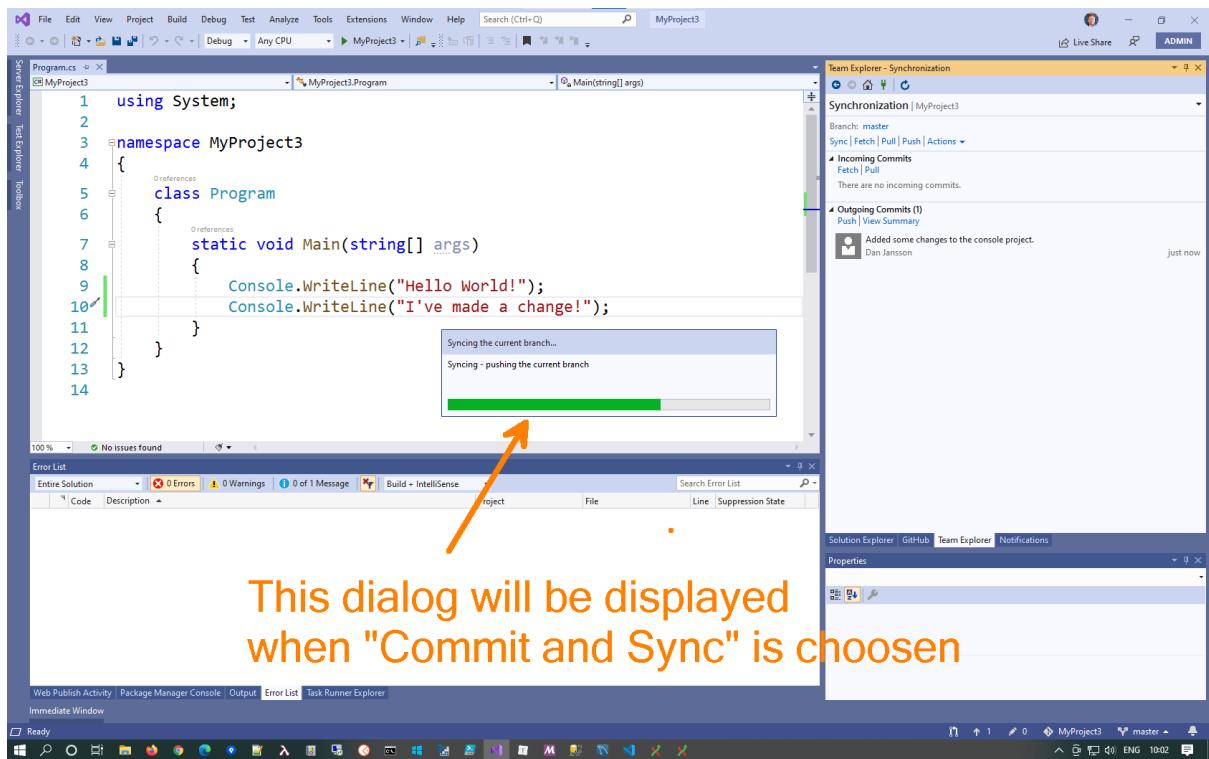

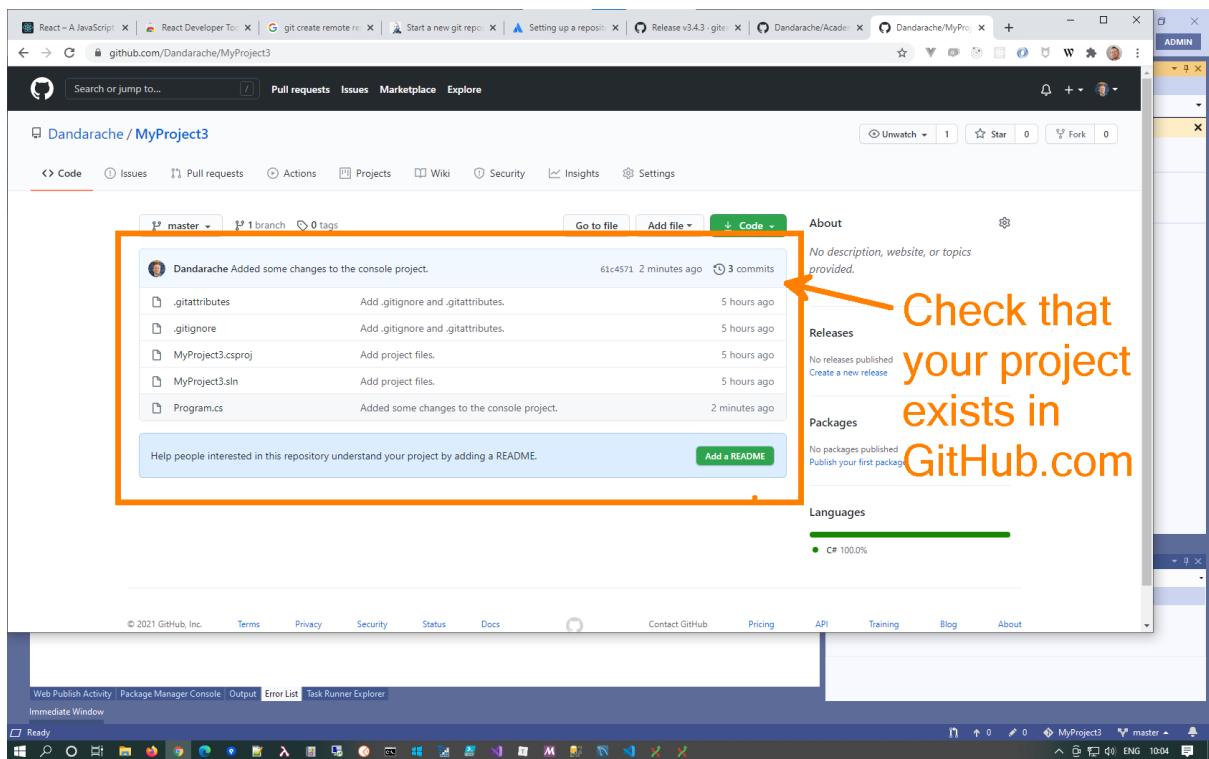

Select files that should be staged by right-clicking them and select "Stage"

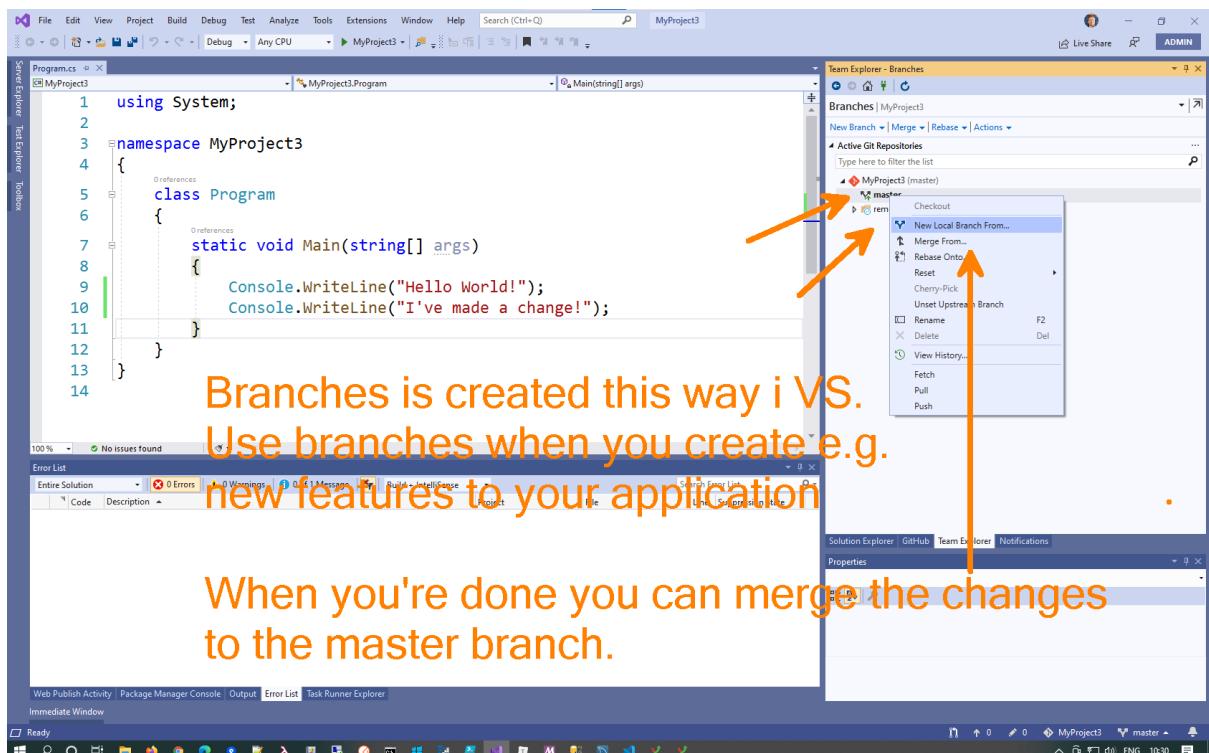

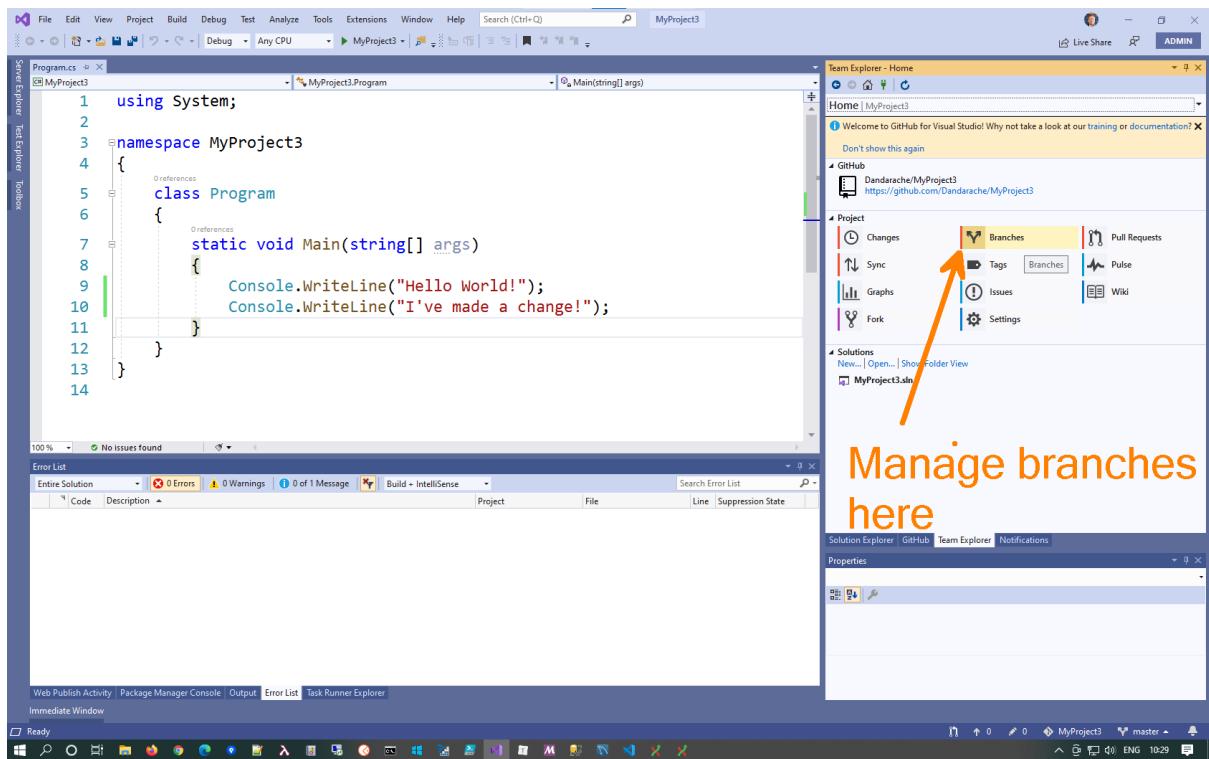

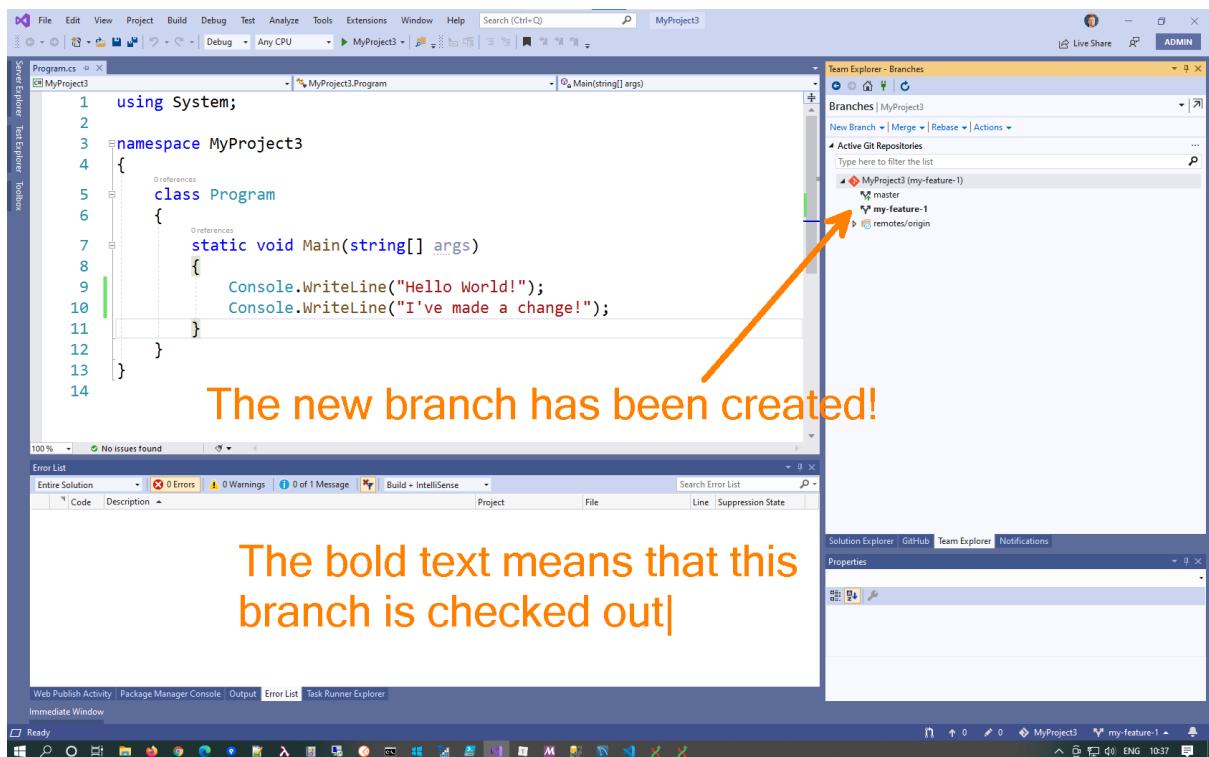

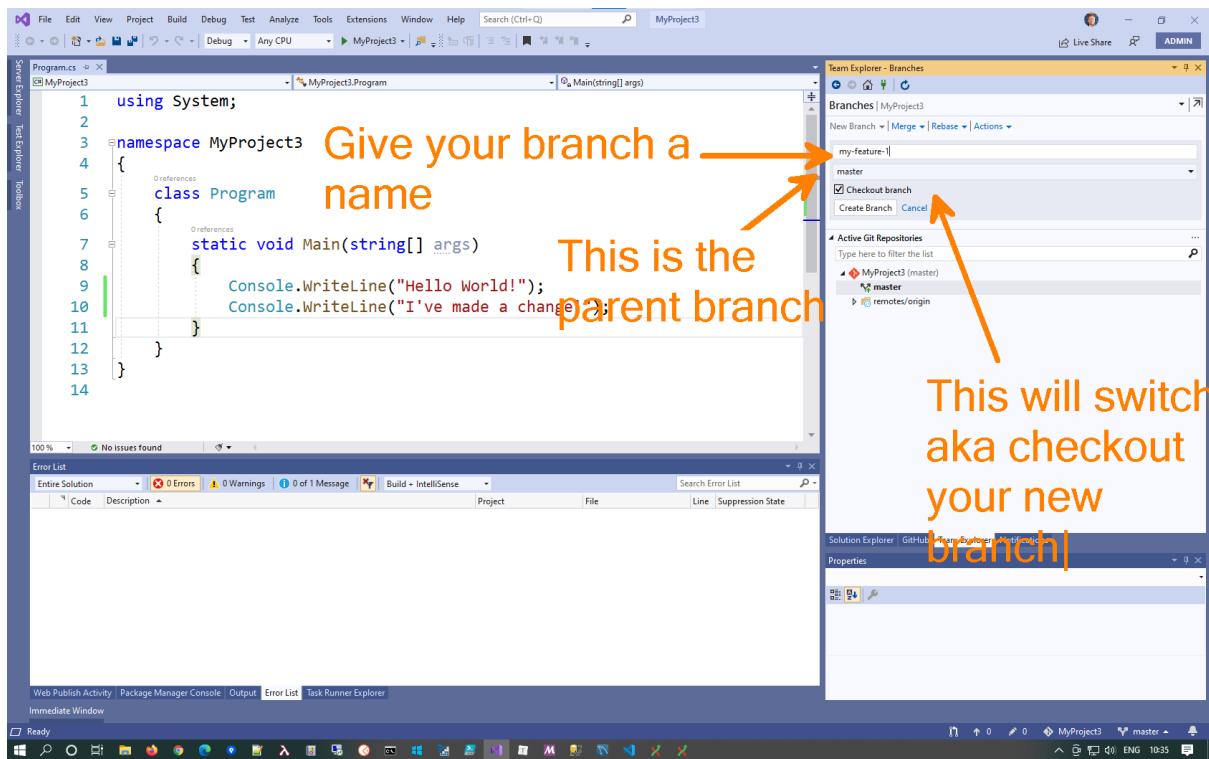

Commit all changes
Commit all changes and push to remote repo

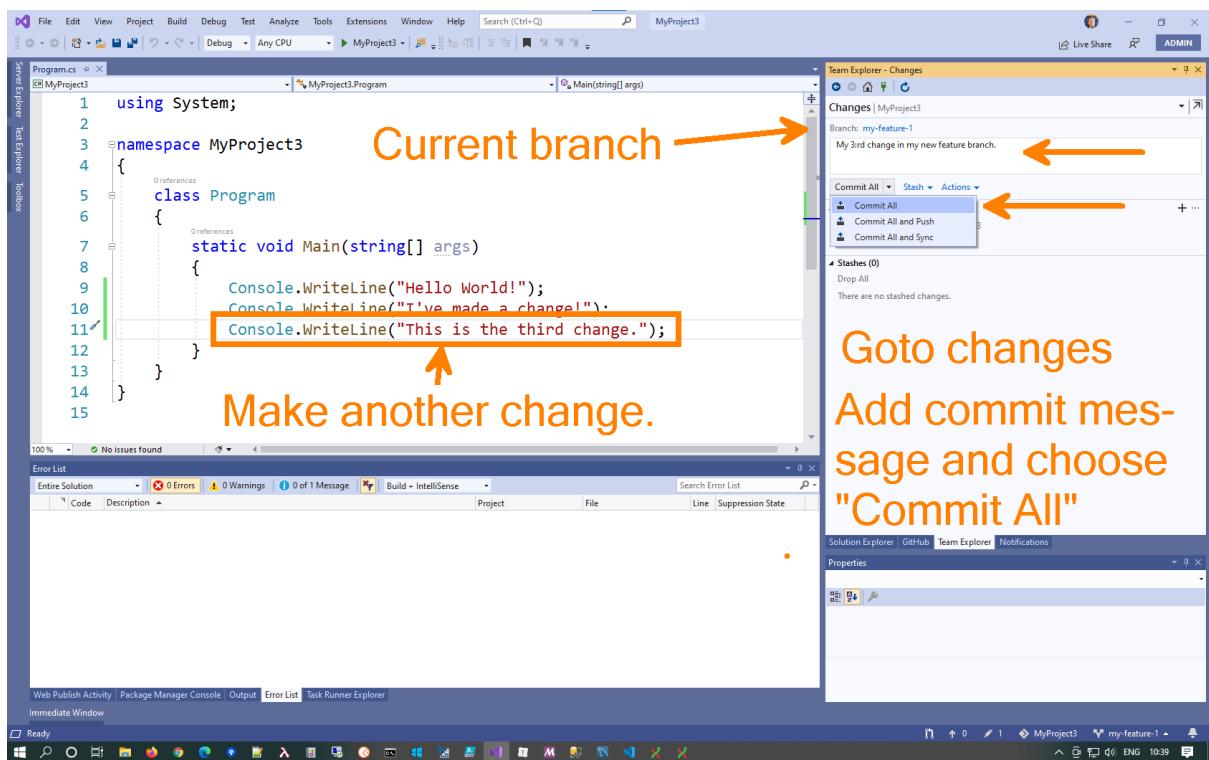

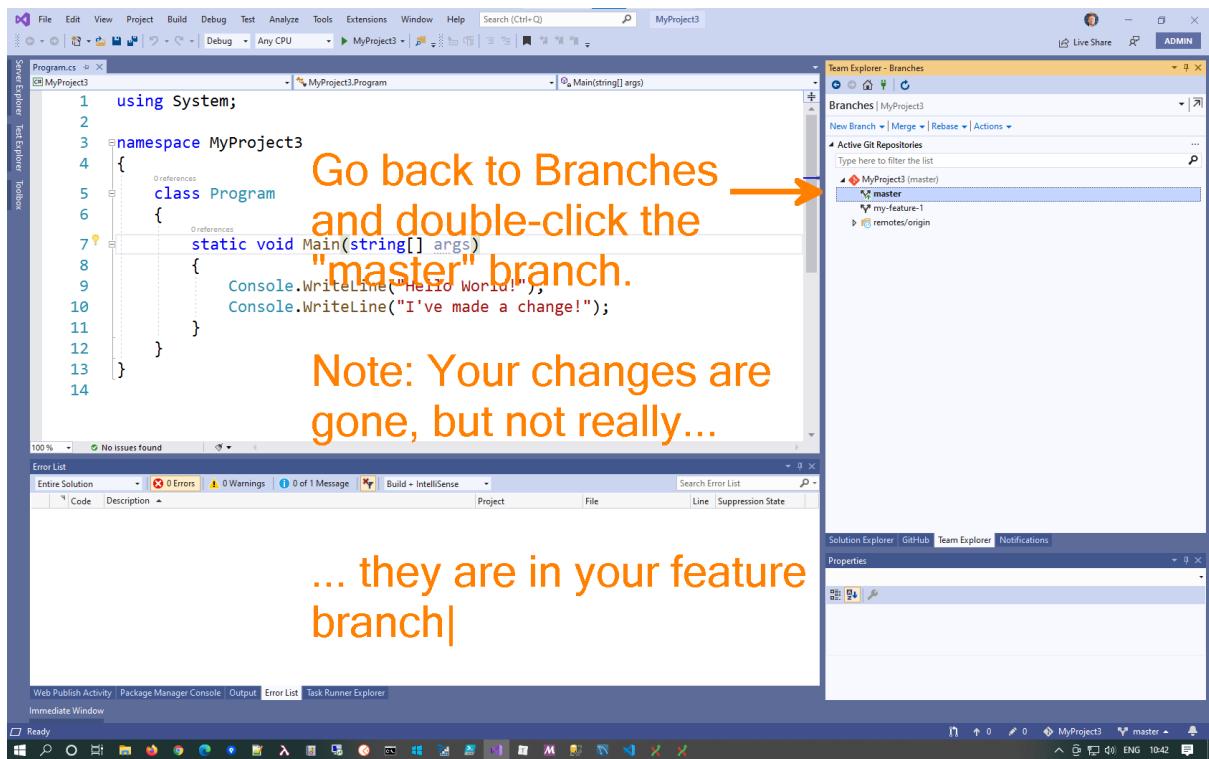

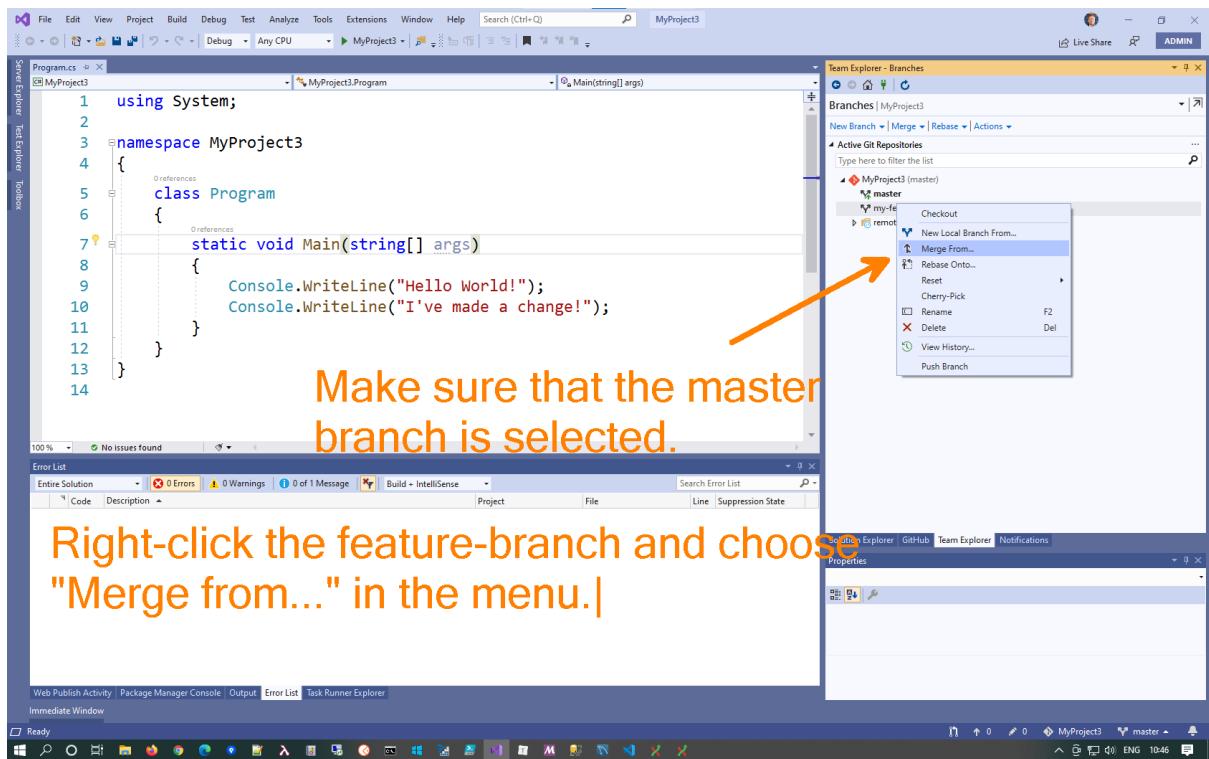

This dialog will be displayed
when "Commit and Sync" is chosen

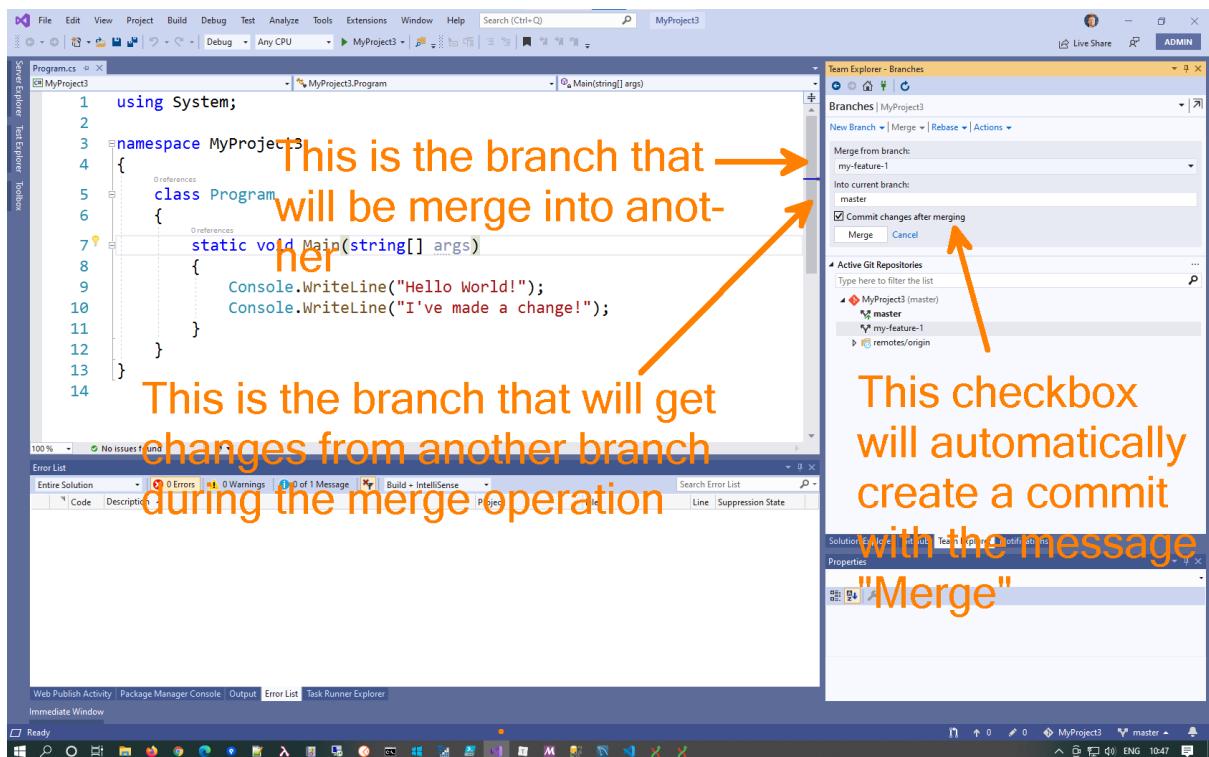

Right-click the feature-branch and choose "Merge from..." in the menu.]

I exemplet nedan står det "link" men det skall vara "text".
